

TO WHOM IT MAY CONCERN

The principals of our company have been in the property industry for over 30 years. We advise on many larger projects over \$100M, but generally provide project management services in the \$200,000- \$10.0M range in the Sydney region.

In this role we have used Brian Wood (BRW Electrical) over approximately 6 years on a variety of projects including:

1. Refurbishment of Heritage Office Building –Pymont (full electrical and IT wiring fitout including MSB)
2. Office Fitout- Sydney CBD (electrical/IT)
3. Office building refurbishment- St Leonards (new electrical including MSB)
4. Penthouse residential unit – Pymont (rewiring)
5. Industrial -St Marys (technical review)

We have always found Brian to be very trustworthy in his dealings with us. He is co-operative with other trades and very conscientious about safety issues. He is prepared to carry out smaller jobs where needed as well the required supervision and communication skills to manage a larger team of electricians on bigger projects when required. His quotes are competitive and he has good ideas for making improvements to the jobs. He is then able to keep to agreed budgets and complete on time to a quality standard.

I have no hesitation at all in recommending Brian as one who always performs his job diligently and with a high level of service.

Yours sincerely

Ian Dalgarno
